PROFESSIONAL PROFILE

She has achieved a Master Degree in Economic Sciences at the University of Naples in 2017, developing a final dissertation entitled *The complementary social security*. The thesis defines a classification of the tools of the complementary social security in the National and European context and the role of the Social Security funds for the development of the financial system.

She has worked as teacher of Business Administration in technical institutes and she has matured many professional competences thanks to the participation to several training courses.

She has been engaged in consulting activities in the environmental field. The task objective was the protection and the enhancement of the natural resources, of the historical heritage and the artistic patrimony, of the territory and the landscape, as driving forces of life styles, production and consumption behaviours that are inspired to the eco-development and based on a respectful relationship between the human beings and the nature.

In May 2016, she has achieved a I level Master in "Business Management". She acquired technical and managerial competences that are fundamental to operate within the strategic functions for business development of the business as well as to enter the business consulting, implementing innovation and digital transformation processes.
